### Abbreviations

Ab	Antibody	GABA-BR	Gamma aminobutyric acid receptor, type B
AMPA	AMPA receptor	GAD65	Glutamic acid decarboxylase 65-kilodalton isoform
ANNA	Antineuronal nuclear antibody	IFA	Indirect immunofluorescence assay
AQP4	Aquaporin-4	IgG	Immunoglobulin G
CASPR2	Contactin-associated protein-2	IgLON5	IgLON family member 5
CBA	Cell-binding assay/cell-based assay	ITPR1	Inositol 1,4,5-trisphosphate receptor type 1
CSF	Cerebral spinal fluid	LGI1	Leucine-rich, glioma-inactivated protein 1
DPPX	Dipeptidyl aminopeptidase-like protein 6	mGLUR1	Metabotropic glutamate receptor 1
ELISA	Enzyme-linked immunosorbent assay	NMDAR	N-methyl-D-aspartate receptor
GABA-AR	Gamma aminobutyric acid receptor, type A	PCCA	Purkinje cell cytoplasmic antibody
		RIA	Radioimmunoassay
		VGKC	Voltage-gated potassium channel

<sup>a</sup>Performed as reflex only.

<sup>b</sup>If the comprehensive panel is ordered, AQP4 CSF testing is not performed.
