

**OFFER ONE-TIME SCREENING TO ALL INDIVIDUALS 13-64 YEARS OF AGE AND MORE FREQUENT SCREENING FOR HIGH-RISK<sup>a</sup> PATIENTS**

## Preferred Screening

**Notes**

<sup>a</sup>Men who have sex with men, those with HIV-positive sexual partners, multiple sexual partners, or history of blood transfusion, intravenous drug use, or another sexually transmitted disease

<sup>b</sup>Consider retesting in high-risk patients if clinically indicated

<sup>c</sup>If the initial screen performed was an Ag/Ab combination assay, NAAT testing is recommended for follow-up; NAAT testing is also recommended following a negative western blot if recent exposure or primary/acute HIV infection is suspected
