

# Lyme Disease Testing Algorithm

[Click here for topics associated with this algorithm](#)

<sup>a</sup>If using reflex testing to western blot, use the appropriate reflex test ([early](#) vs [late](#)) depending on clinical symptom onset.

<sup>b</sup>If onset is acute, consider testing for Powassan virus; contact state health department for testing information.

### Abbreviations

IgG	Immunoglobulin G
IgM	Immunoglobulin M
CSF	Cerebrospinal fluid
ELISA	Enzyme-linked immunosorbent assay
PCR	Polymerase chain reaction
